SOFTWARESTORE BUILDER APP TUTORIAL- How to Get Hosting

With SoftwareStore Builder, you will be able to get your hosting service in order to create your own website. A web host, or web hosting service provider, is a business that provides the technologies and services needed for the website or webpage to be viewed in the Internet. Note that this will only apply if you don't have your own website yet.

To get started, on your SoftwareStore dashboard, click on the Get Hosting tab. Sign up with your preferred hosting providers, take note that each has a minimal fee to sign up with.

You may sign up with HostGator for as low as \$2.75/month. A2 Hosting for as low as \$3.92/month and with Namecheap for as low as \$2.88/month. Just click on the Sign Up button to the hosting provider you prefer to use.
